

HOW TO ADD FLEXAUST TO YOUR SUPPLY CHAIN

FLEXAUST®

Company Overview

For more than 80 years, Flexaust has been creating reliable flexible hose and ducting solutions for a wide range of industries involving air, dust, fume, and lightweight materials. Our mission started in 1938 when founder Harold Hersey developed the first flexible hose system for mining operations in Arizona. During World War II, we developed and enhanced our ventilation solutions to meet the needs of expanding industrial applications. Since then, we have continued to provide industry-leading hose and ducting products to improve workplace environments within a variety of industrial and commercial applications.

With five manufacturing facilities across the U.S., we can complete even the most complex projects with an average lead time of 2 weeks. We also offer a 24-hour premier products shipping program, so you can obtain a selection of critical products when you need them. Our worldwide presence allows us to serve markets in North America, South and Central America, Australia, and Canada.

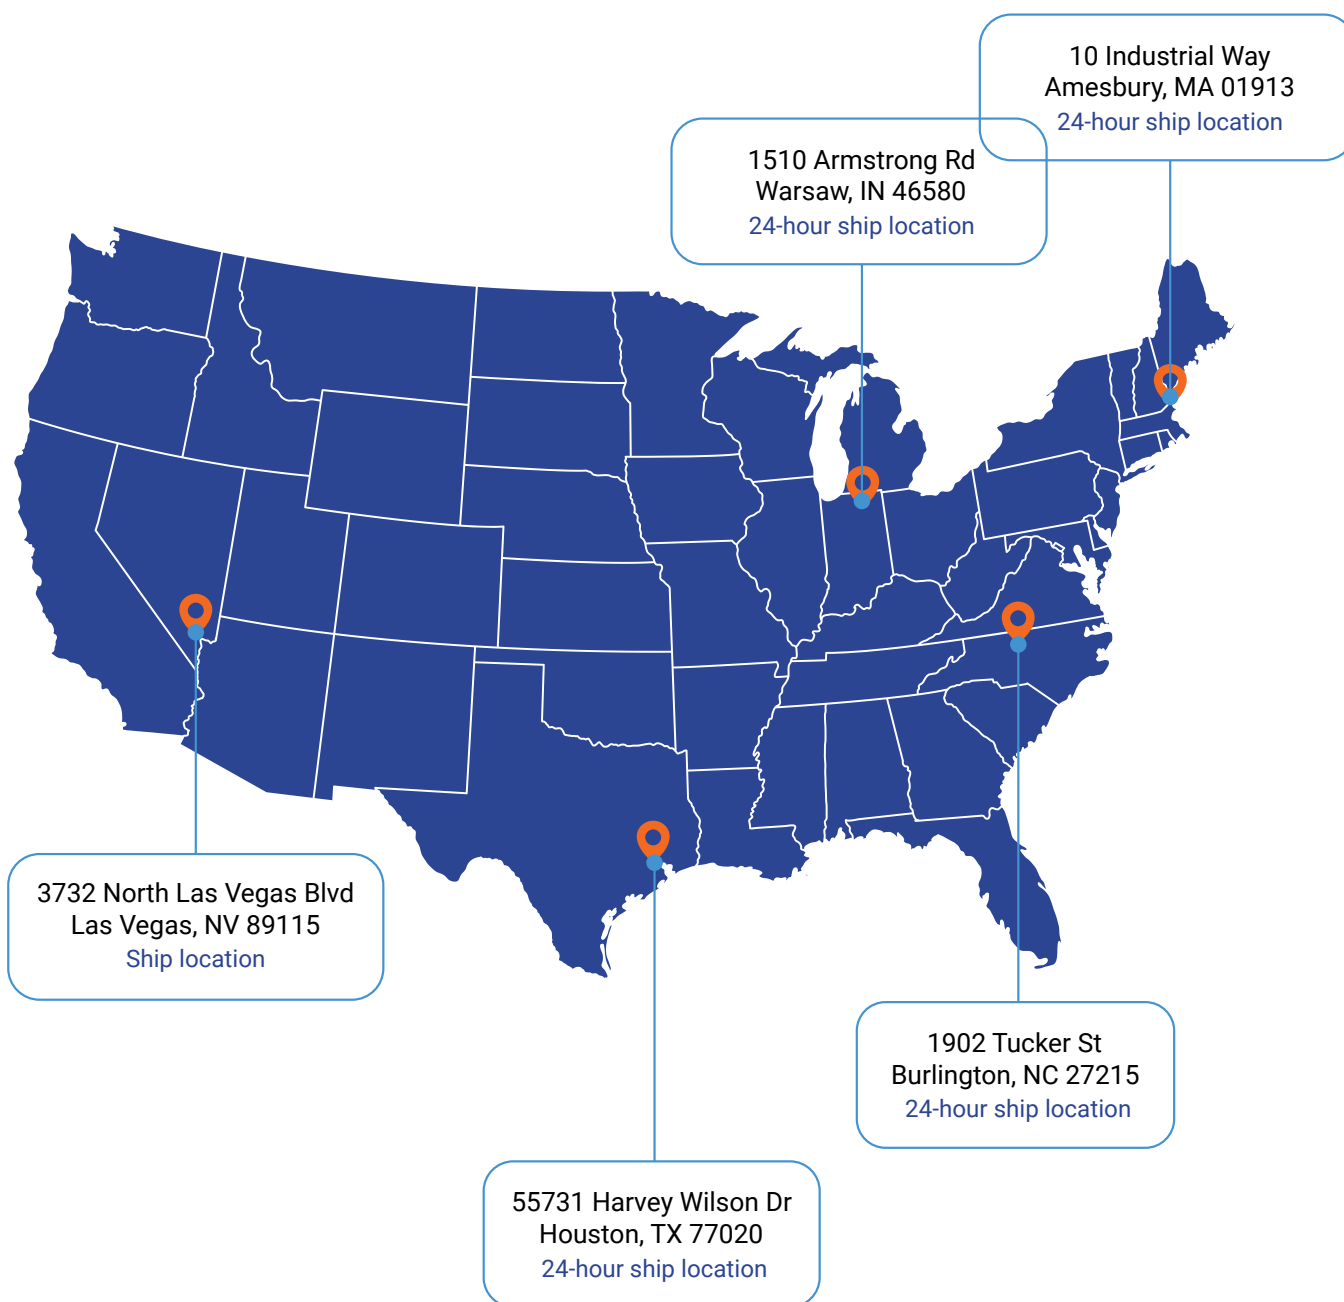

Our commitment to technology and innovation, streamlined processes, and expanding product capabilities allow us to exceed our customers' needs, no matter the application. Regardless of your industry requirements, we have the resources and experience to provide quality solutions without delay, even during uncertain times.

To learn more about how we tackle challenging projects, check out this [case study](#), which highlights the creation of the respirator hose assembly required for the PAPR. You can also visit our [Applications Page](#) to learn more about the industries we serve.

At Flexaust, we pride ourselves on having the following four strengths: a global presence, a dedication to making the most valuable decisions for our customers, a philosophy for slow and steady growth, and strong relationships with each of our clients. These strengths, as well as our breadth of experience, allow our customers to put their trust in us to solve any issue they have.

Facilities & Locations

All of Flexaust's products are made in the USA, and we maintain sales and support offices throughout the country. See below for our corporate locations, sales offices, and manufacturing facilities.

Engineering and R&D

At Flexaust, our engineering and R&D capabilities allow us to stay on top of market trends and innovations. We incorporate the latest operating standards and have a strong understanding of various industry needs. Flexaust can make hoses in 14 different ways, allowing us to create products to meet a wide range of performance requirements. We also operate in accordance with the latest ISO 9000 standards and offer superior quality assurance programs and customer service.

Our testing procedures for raw materials as well as our wide variety of quality and equipment tests illustrate the quality and depth of our engineering capabilities. When combined with our dedication to building long-lasting relationships with customers, distributors, and end users, Flexaust is a trusted provider and source for industrial hoses.

We embrace our innovative and entrepreneurial spirit and strive for continuous improvements. With a wide product selection, including plastic wet and dry vacuum hoses, wire reinforced fabric and plastic hoses, hand-bendable metal ducting, and blow molded corrugated tubing, our customers can choose the best hose for their specific application.

Flexaust offers over 15 hose products that are listed as [UL 94V-0](#) flame retardant. Our UL rated products are available in a broad range of sizes, materials, and designs. We are also a proud member of the Hose Safety Institute.

Quality

With a focus on innovation and creativity, Flexaust is dedicated to producing the highest quality products and exceeding customer expectations. As demand for innovation increases, we take a steady, measured approach to development, ensuring that each product and component meets rigorous quality standards. It is our goal to create superior products that provide lasting value to our customers.

All of our runs, set-ups, and in-process inspections are performed per our ISO-driven Flexaust Quality Management System manual. We operate in accordance with ISO 9001 standards thanks to the managerial excellence of our Quality Assurance Department.

Our comprehensive portfolio of products includes:

- Wire-reinforced coated fabric hose
- Regular and stretch wire-reinforced plastic hose
- Hand-bendable metal ducting
- All-plastic wet and dry vacuum hoses
- Blow-molded corrugated tubing

We use the latest technology to create quality products from a variety of materials, including:

- PVC
- Polyurethane
- Polyester
- Thermoplastic rubber
- Vinyl fabric
- Neoprene
- Polyethylene

Ongoing Commitment to Innovation

Since our founding in 1938, Flexaust has had an extensive history of innovation. With decades of experience in the hose and ducting business, we are familiar with industry turbulence, and we understand what it takes to maintain stability. We largely attribute our longevity to our commitment to technology and innovation. Flexaust recognizes the different needs of our customers worldwide, and our streamlined processes ensure that we meet and exceed those needs in a timely manner.

At Flexaust, we are always looking for ways to expand and improve. We continue to modernize all of our systems, and we consistently come up with new products and solutions to help us stay on top of industry changes and shifts in demand.

24 Hour Shipping Program

At Flexaust, we know that time is crucial to any operation, and it is our goal to resolve your duct and hose challenges as quickly as possible. With our 24-hour shipping program, you can receive select products within 24 hours, guaranteed. Simply look for the 24-hour ship icon, and place your order. We will ship your order (maximum 250 ft.) by the end of the next business day, or we will cover the freight costs.

Product Catalogs, Marketing and Technology

We offer a variety of resources to help you determine the right hose and ducting products for your applications. Our digital marketing efforts grant you access to blog posts, resource pages, and dynamic searching to make it easy for you to find the best solution for your application requirements. Additionally, our catalogs and website remain up to date with the most accurate information. These include:

- **[Flexible Hose, Ducting, and Accessories Product Catalog](#)**. This updated product catalog features our Complete Collection, including designated 24-hour ship products.
- **[Flexaust Commercial Vacuum Catalog](#)**. This is your go-to source for vacuum hose and cleaning attachments. We offer the broadest selection of hoses and attachments in the industry.

We also have the Flexaust Connect mobile app. As our customer base gets younger, we understand the importance of being interactive and staying visible. To keep up with online industry trends, our Flexaust Connect mobile app offers users a quick, streamlined way to research and order their hose, ducting, and accessories from any location.

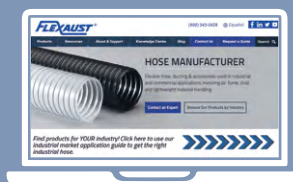

At Flexaust, we want to make sure you get the best possible hose and ducting solutions for your specific application. In order to do this, we follow the industry standard “STAMPED” acronym, standing for size, temperature, application, media, pressure, end fittings, and delivery. The STAMPED process allows us to use the industry standard for assisting in determining the correct hose, coupling, and attachment that is needed for a customer’s application.

Our People & Expertise

We pride ourselves on the longevity of our employees. With decades of experience, we are experts in the hose and ducting industry and have the necessary knowledge to deliver the best products for our customers' needs. Flexaust employees collaborate across teams, sharing knowledge and information that leads to product and service improvements. By investing in engineering and technical staffing, we have been able to innovate our products and services to meet the changing needs of the industry and our customers. At Flexaust, our inside technical sales group and outside sales teams focus their unique skills on each project to guarantee the highest quality products and solutions.

Flexaust: Your Source for Outstanding Flexible Hose and Duct Solutions

At Flexaust, we are dedicated to developing lasting solutions for our customers in every industry. As we aim toward the future as part of the international Schauenburg Group, we continue to expand our global support network. With enhanced resources and heightened manufacturing capabilities, we will continue to be an industry leader in the development and manufacture of superior hose and ducting products.

To learn more about Flexaust's selection of hose and duct products and accessories, [contact our experts today](#). You can also check out this [cover story](#) to learn more about our history and innovative solutions.

About Flexaust

Flexaust has manufactured durable, long lasting, flexible hose and ducting solutions for industrial and commercial applications for 80 years. Our hose products are used in applications involving air, dust, fume and lightweight materials.

It all began in 1938 when Arizona mining engineer Harold Hersey filled a desperate need for the mining industry by developing the first flexible hose system to vent fumes and bring fresh air to hard working miners. The transition from mining to industrial applications was sparked by the heavy construction activities of World War II. After the war, Flexaust continued to grow by supporting industry with hose and ducting that would improve the workplace environment.

We are proud of our past, but more importantly, we are excited and focused on the future. As part of the international Schauenburg Group, our worldwide support network provides Flexaust with more resources and manufacturing capabilities to provide the best hose and ducting products and service to our customers.
